

## GEMSTONE REPORT

EDELSTEINBERICHT  
RAPPORT DE PIERRE PRÉCIEUSE  
PLATINUM RARITY AWARD ISSUE

No. GRS2024-011313 (Award No. 4846)  
Date 18th January 2024  
Object One important gemstone  
Identification Natural Ruby

Weight 7.03 ct  
Dimensions 13.95 x 10.37 x 4.75 (mm)  
Cut brilliant/step (4)  
Shape oval  
Color vivid red \*  
Comment No indication of thermal treatment

See reverse for important information, terms and limitations

### Origin

Gemmological testing revealed characteristics corresponding to those of a natural ruby from:

Mozambique

\* Special comment see appendix

# PORTRAIT OF ONE IMPORTANT 7.03 CT “PIGEON’S BLOOD” RUBY

Appendix to GRS2024-011313

Award No. 4846

---

**G**RS Laboratories examined a 7.03 ct natural ruby, described in report number GRS2024-011313, demonstrating very good characteristics worthy of a dedicated mention.

This important ruby is distinguished by a very rare combination of large size, a fine vivid red color variety, very good brilliance and transparency, and a large face-up appearance.

Analytical and advanced testing traces the origin of this gemstone to the mines of Mozambique, the mining area currently producing the largest and most significant rubies. The fascinating internal world of classic Mozambican ruby inclusions can be clearly witnessed in this particular gemstone. At the time of testing, it was concluded that the gemstone was spared from thermal enhancement.

The combination of very good attributes that this ruby displays was concluded to be important. This vivid red Mozambique ruby is reminiscent in color saturation of “GRS-type pigeon’s blood ruby” (without strong fluorescence). The vivid red color radiates harmoniously in tone and color saturation. A high degree of lapidary craftsmanship adds value to the nature of this gemstone.

Untreated rubies of such large size and high quality are very rare.
