ARGYLE PINK™
DIAMONDS

Gem Analysis Report

ORIGIN ANALYSIS: THE PHYSICAL AND SPECTROSCOPIC CHARACTERISTICS OF THIS DIAMOND HAVE BEEN ASSESSED AS CORRESPONDING TO THOSE FOUND IN DIAMONDS FROM THE ARGYLE DIAMOND MINE IN WESTERN AUSTRALIA.

ID No.	AO 464658
CARAT WEIGHT	0.25ct
SHAPE	Radiant Square
CLARITY	P1
COLOUR	2PP
DATE	6 March 2025

The above diamond has been graded for colour and clarity by Argyle Diamonds Limited in accordance with its proprietary grading system. Physical and spectroscopic analysis was performed by Gemlab (Belgium) BV, based on current scientific knowledge and proprietary techniques, to confirm the presence of characteristics indicative of the stated origin. Tests performed include Raman/photoluminescence spectroscopy, UV-Vis-NIR spectroscopy, FTIR spectroscopy, DFI fluorescence analysis, and microscopic analysis.
